

Anjali Kumari

Software Engineer

anjalirajwar222@gmail.com +91-62070xxxxx [Linkedin](#) [Github](#) [Portfolio](#) India

Summary:

Software Engineer with 3 years of experience building scalable, production-grade systems using React and Spring Boot. Hands-on experience with large-scale systems, application resiliency, architecture design artifacts, and data visualization. Skilled in troubleshooting complex systems, improving performance, and ensuring stable and secure applications.

Education:

Bachelor of Technology — BIT Sindri **Aug 2019 - July 2023**
Information Technology — CGPA: 8.80
Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Software Design and Computer Networks .

Skills:

Languages	Java, JavaScript (ES6+), SQL
Frontend	React.js, Next.js HTML, CSS, JavaScript (ES6+)
Backend	Spring Boot, Microservices Architecture, REST APIs
Database	PostgreSQL, MySQL (queries, joins, optimization)
Tools & Frameworks	Git, GitHub, Maven, Gradle, Postman
Concepts	Data Structures & Algorithms, System Design), SDLC, OOPs
Testing & Debugging	Unit Testing, Debugging, Logging
DevOps / Agile	CI/CD, Agile, Scrum
Security	JWT Authentication, Role-Based Access Control, Application Security, Resiliency
Cloud	AWS
Data Handling	Data Analysis, Handling Large Datasets

Experience:

Software Engineer — Maya Data Privacy Limited **Aug 2023 - Present**

- Worked on UI using React, HTML, CSS, made pages and fixed UI issues.
- Built Spring Boot microservices for handling large data, made system faster and more stable, also worked on application resiliency
- Used SQL and database, wrote queries and managed data properly.
- Did coding, testing and debugging, fixed bugs and kept system stable and secure.
- Used AWS services like EC2/S3 for deployment and scalable infrastructure, also worked with Git and CI/CD.
- Followed SDLC and agile process, did system design basics and worked in team.

Trainee/ Intern - SWE — Maya Data Privacy Limited **March 2023 - Aug 2023**

- Trained on UI and backend using React and Spring Boot, worked on small features and fixed bugs.
- Learned coding, testing and debugging, and helped in keeping system running properly.

Projects:

MERN Real Time Chat Application [Code](#) — [Live](#)

- Developed scalable React architecture supporting real-time communication using WebSocket architecture .
- HTML5, Socket , Event system, CI/CD pipelines and Integrated RESTful APIs using optimized asynchronous operations.
- Designed reusable UI Component Driven Development & architected front-end structure for maintainability .
- Implemented state management using Redux and Context API for complex application workflows and frontend performance .

Achievements:

- 🏆 Awarded by Employee of the Month in October 2025 at Maya Data Privacy Limited .
- 🏆 Rank 2 in CBSE Model Exhibition .
