 Portfolio

Summary:

Frontend-focused Full Stack Engineer with **3+ years** of product development experience.
Built and owned **15+ production features** with React, REST APIs, testing, deployment, and monitoring.
Experienced in AI integrations, frontend architecture, Playwright, performance optimization, and Agile dev.

Skills:

Languages:	JavaScript, Python, c++, java, TypeScript, SQL
Frontend:	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit, React Query, Accessibility (WCAG), Performance Optimization, Jest, Playwright
Backend:	Node.js, Spring Boot (Basic), REST APIs, GraphQL, PostgreSQL, MongoDB, Redis, Docker, AWS, OpenAI APIs
Architecture:	Microservices, System Design, Design Patterns, SOLID Principles, DSA

Experience:

Senior Software Engineer	Maya Data Privacy Limited, Ireland (EOR: Thumbina)	2025 - Present
- Owned 10+ production features using React, TypeScript, Node.js and REST APIs, delivering end-to-end solutions from technical design to deployment, monitoring and continuous improvement. - Built 6+ AI-powered features using OpenAI, Gemini and Anthropic APIs, integrating AI chatbots, intelligent agents and prompt engineering into production workflows. - Contributed to 3+ product modules across monolithic and microservice architectures, improving scalability, maintainability, code quality and engineering productivity through Agile development and code reviews.		
Software Engineer	— Maya Data Privacy Limited - Payroll By Thumbina	March 2023 - 2025
- Built 40+ reusable React components using React, Redux Toolkit, React Query, Zustand and React Router, improving development speed and UI consistency. - Improved frontend performance by 35% using lazy loading, code splitting, memoization, bundle optimization, virtualization and Core Web Vitals best practices. - Developed and integrated 25+ REST APIs with JWT, OAuth 2.0, RBAC and secure frontend-backend communication using HTTPS and CORS. - Delivered 20+ responsive screens from Figma with accessibility (WCAG), responsive design, debugging and cross-browser compatibility while collaborating with QA teams.		

Projects:

DocuVerse AI – PDF to Chat Application	GitHub Code — Live Demo
- Developed an AI-powered PDF assistant using Next.js, LangChain, RAG, Chroma Vector Database and OpenAI-compatible LLMs, enabling document-based conversational search. - Integrated 5+ AI services including Clerk, PostgreSQL, Bytescale and Vercel while building secure API integrations, responsive UI and scalable AI workflows.	
Real-Time Collaboration Platform - MERN	GitHub Code — Live Demo
- Built a real-time collaboration platform using React, TypeScript, Node.js, Express.js and MongoDB, supporting 100+ concurrent users with JWT authentication and REST APIs. - Improved backend performance by 40% using Redis caching, MongoDB indexing, query optimization and scalable backend architecture.	

Achievements:

-  Awarded **Employee of the Month** for delivering **10+ critical product features** with high ownership and quality.
-  Led frontend development and mentored **8 developers** through code reviews, architecture discussions and engineering best practices.
-  Improved development efficiency by building reusable components and frontend standards adopted across **3+ product modules**.

Education:

Bachelor of Technology	— BIT Sindri	Aug 2019 - July 2023
Information Technology — CGPA: 8.80		
Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Software Design and Computer Networks.
